Objective

Seeking an entry-level network technician position where hands-on networking experience and a background in secure military communications contribute to reliable enterprise network operations.

Work Experience

Cryptologic Language Analyst July 2019 – July 2023

United States Air Force

Translated and analyzed Korean-language communications in support of intelligence operations, producing time-sensitive reports for senior leadership and joint service partners. Operated and troubleshot secure communications systems and mission software, maintained accountability for classified material and controlled equipment, and collaborated with multinational teams in a 24/7 operations environment.

Reservations Sales Associate January 2018 – June 2019

Marriott International

Handled reservation sales across a global portfolio of hotel brands, recommending properties and room options based on guest needs and budget. Resolved booking discrepancies to ensure guest satisfaction and consistently met or exceeded individual monthly sales targets.

Education

California State University, Northridge 2025 – Present

Bachelor of Science, Computer Information Technology; Minor in Management · Expected May 2027

Transferred from AVC as a Junior, on track to graduate Spring 2027.

Antelope Valley College August 2023 – May 2025

Coursework in Computer Science program, no degree

Started after leaving the military, studying in transfer program targeting CSUN.
